

XLP™ Plug-in Hybrid Electric Upfit

The World's First PHEV Super Duty Ford F-250 Pickup

The Ford Super Duty F-250 is one of the most popular work trucks on the road today – with the power, versatility and performance today's fleets need to get the job done. For the first time, this high-powered fleet truck is available as a plug-in hybrid electric (PHEV) unit from fleet electrification leader XL. It's the ideal solution to help municipal, utility and commercial fleets drive cleaner, greener vehicles while saving money on fuel costs. The vehicle is scheduled for release in late 2019.

Meet Sustainability Goals

As part of XL's proven plug-in hybrid electric product family, the PHEV Ford F-250 is expected to reduce greenhouse gas (GHG) emissions by 33% while improving fuel economy by 50%, based on initial testing. It's the ideal vehicle for fleets looking to reduce their carbon footprint and meet sustainability goals, while also saving money on fuel costs.

Fleet-Ready™ Performance

XL systems install quickly and easily onto factory vehicles, so they're ready to work immediately within your existing fleet. And because it works in parallel with the OEM powertrain, the PHEV F-250 performs as you expect it to, without range concerns and with the Ford factory warranty intact.

Plug in Your Pickup

- Ford F-250 Pickup (6.2L engine)
- 4x2, 4x4 drivelines
- All wheelbase, cab, and bed size configurations
- Better fuel efficiency from Ford's class-leading 3/4 ton pickup
- Same Ford rating for towing capacity

or email sales@XLfleet.com

Installation complete in just
hours as a ship-thru upfit.

*XL was the first electrification
provider in Ford's eQVM program.*

XLP™ Plug-In Hybrid Electric Drive System

XL has pioneered a plug-in hybrid system that is revolutionary in its simplicity. In addition to regenerative braking, the XLP features a volume production-ready, high voltage lithium battery pack. XLP is compatible with Level 1 and Level 2 charging using an industry-standard J1772 plug interface. The XLP system has no special maintenance requirements.

XLP eBox Includes:

- Motor Drive
- Cooling Pumps & Reservoir
- PHEV Controller
- 15 kWh Battery

Rear Bumper Plug Port

XLP™ Hybrid System

Specifications

MPG Improvement*	50%
Charging	Level 1 (<12 hrs.) or Level 2 (<5 hrs.) plus regenerative braking
Lithium Ion Battery	15 kWh
System Weight	750 lbs
Electronic Speed Governor	Up to 80 MPH
Component Warranty	3-Year / 75,000 Miles

XLlink™

Intelligent Decisions

Our proprietary, cloud-based, vehicle connectivity platform provides actionable intelligence, including speed, idling, vehicle drive cycle, and CO2 emissions reduction.

Available on the Ford F-150 and Ford F-250 pickups. (4x2 and 4x4 drivelines)

*Based on initial testing; actual MPG may vary.
